

EVO 150 – COMPACT WEB GUIDE CONTROLLER

Superior power and advanced technology in a compact 24V DC web guide controller.

The EVO 150 offers both versatility and reliability in an unusually small package. Easily integrated with industry standard networks, the EVO 150 is readily compatible with all AccuWeb dynamically compensated WideArray™ and PointSource™ edge detectors.

- **24V DC Operation** – The EVO 150 controller is easy to integrate into existing converting lines or control panels.
- **150 Watts of Power** – Powerful enough to control actuators on all guiding applications.
- **Advanced Brushed or Brushless Drive** – Ideal for new or retrofit applications whether brushed or brushless, facilitating the use of maintenance-free brushless actuators.
- **Easy Installation** – The EVO 150 control module is ready for DIN rail mounting, or available in a IP65 rated metal enclosure with an optional switchpad or touch screen HMI panel.
- **Network Friendly** – Optional EtherNet/IP, PROFINET I/O and discrete I/O communication protocol allow quick and easy interface with existing control networks and PLCs.
- **Web Accessible** – Integrated web EtherNet port allows uploading and downloading of guide settings and performance data.
- **DualEdge™ Guiding** – Capable of centerline guiding webs up to 18" wide using a single Wide Array™ edge detector.

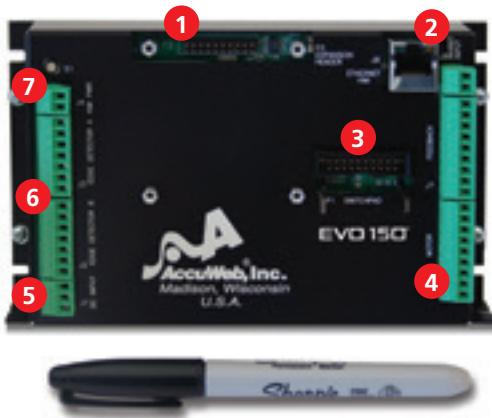

A Better Web Guide Controller Design from AccuWeb

- Controls maintenance-free brushless motors.
- Optional communication protocols simplify interfacing with existing PLC control systems.
- EVO 150's compact metal enclosures come ready to plug and play.
- 24V DC operation accepted globally.
- Equipped with AccuWeb's DualEdge™ technology for centerline guiding with a single WideArray™ edge detector.
- Capable of web oscillation, electronic guide point adjustment, web width measurement, and web position monitoring.
- Made in the USA by AccuWeb.

Specifications

- **Input Voltage:** 24V DC
- **Enclosure Options:** 4.3" HMI touchscreen, Switchpad, DIN rail mounting
- **Temperature:** 30°F (0°C) – 125°F (52°C)
- **Interface Compatibility:** Optional discrete I/O, Optional EtherNet/IP, Optional PROFINET I/O
- **Options:** DualEdge™ Technology, Web width monitoring, Oscillation, Randomization, Chaser/Slave web guiding , Remote guide point adjust , Remote line guide adjust

EVO 150 – COMPACT WEB GUIDE CONTROLLER

- ① EtherNet/IP Port
- ② HMI Panel Connection
- ③ Switchpad Connection
- ④ Actuator Connection
- ⑤ DC Input
- ⑥ Connections for 2 Edge Detectors
- ⑦ HMI Power Input
